

Model **Pallet Stacker/Dispenser**

- ★ Cleanout Access Opening
- ★ 100% Safety Guarding
- ★ Integrated Control Panel
- ★ Standard Pallet Guides
- ★ Welded Construction

- ★ Load Weights up to 2000 lbs. Maximum
- ★ Quiet Operation at Less than 70 Decibels
- ★ Available in Various Dispensing Configurations including Right Hand, In-Line and Left Hand
- ★ Can be Designed to Integrate with Other Conveyors
- ★ Control Panel Included

The Pallet Dispenser/Stacker comes with a standard 96 inch magazine, although taller stacks may be accommodated. The standard unit handles loads of up to 2000 pounds. The unit easily handles wood, plastic and nestable pallets as well as slave boards and wire baskets.

This product works very well in applications where the system requires the control and orderly flow of pallets. It is also capable of working in a system where both the stacking and dispensing are required.
